DIY Lava Lamp

Create your own lava lamp from supplies you might have around the house! Fun for all ages!

Materials

- 1 empty water bottle with cap
- Vegetable oil
- Food coloring
- Alka-Seltzer or other antacid tablet

Instructions

Fill the water bottle about 2/3 of the way up with the vegetable oil. Add water until it is about 1 inch from the top. Add 10 drops of food coloring. Add ½ of the Alka-Seltzer tablet. Enjoy! This project can be saved and done again by adding additional Alka-Seltzer tablets.

Please note- do not replace the cap immediately after adding the Alka-Seltzer tablet. Too much pressure will build up.
